## PROJECTS / OPEN-SOURCE

BUILD-IT | [LINK](#)

Html,CSS,Javascript,Express js,Handlebars. js

This project is a vital platform that connects users with skilled labor and construction materials, enhancing job opportunities and entrepreneurship in the construction industry. It promotes resource efficiency and sustainable building practices within our communities. The platform utilizes Express, Handlebars, and MongoDB to connect users with labor and materials, facilitate convenient purchases, and support sustainable practices

DEEP REALITY | [LINK](#)

React js ,Javascript,VGG16 CNN,FastApi

This project addresses the issue of deepfake videos, which spread misinformation by depicting people saying or doing things they never did. Using deep learning, the system detects deepfakes by analyzing videos, extracting face regions, sampling frames, and applying convolutional neural networks (CNNs) for feature extraction. The models are trained on diverse datasets of real and fake videos to classify new ones accurately. Key tasks include meeting performance requirements, collecting datasets, and visualizing results to detect and control deepfake manipulations, enhancing trust in online content.

SUPERHERO SEARCH & GENERATOR: POWERED BY SUPERHERO API | [LINK](#) Javascript,Html,CSS

Developed a dynamic web application that allows users to search for detailed information on any superhero, including powers, stats, and background.

Implemented a random superhero generator that provides users with unique hero abilities and backstories.

Designed with a user-friendly interface for smooth, quick searches and seamless hero creation, making it perfect for developers and fans of superheroes.
